# OFFICE OF ALCOHOLISM AND SUBSTANCE ABUSE SERVICES

# MISSION

The mission of the Office of Alcoholism and Substance Abuse Services (OASAS) is to improve the lives of New Yorkers by leading a premier system of addiction services through prevention, treatment, and recovery.

# ORGANIZATION AND STAFFING

Headed by a Commissioner appointed by the Governor, subject to Senate confirmation, OASAS is responsible for the development and management of the State's policy on chemical dependence and problem gambling. The Office exercises these responsibilities directly as a provider of treatment services through a statewide system of Addiction Treatment Centers (ATCs), through the regulation and oversight of over 1,550 chemical dependence and problem gambling prevention, treatment, and recovery service providers, and as a conduit for Federal and State financial assistance. The Office also furthers State policy goals in areas that include Public Safety, Public Health, Public Welfare, and Public Education by coordinating chemical dependence and problem gambling resources and strategies in collaboration with other State agencies through the Addictions Collaborative to Improve Outcomes for New Yorkers (ACTION).

# **BUDGET HIGHLIGHTS**

The 2011-12 Executive Budget recommends nearly **\$671 million** All Funds (\$432 million State Operating Funds; \$239 million Other Funds) for OASAS, which represents a decrease of **\$46 million (-6.4 percent)**, which is largely attributable to the actions summarized below.

The Executive Budget reduces each agency's General Fund State Operations budget by 10 percent. These savings are intended to be achieved through administrative efficiencies in non-personal service and negotiated workforce savings that minimize layoffs to the extent possible.

In addition to 10 percent reductions in State operations, major new actions to promote cost efficiency include:

- Deferring Cost-of-Living Adjustment (COLA). Defer the planned 1.2 percent human services COLA for one year. However, to continue the State's long-term commitment, a three-year human services COLA is planned to commence April 1, 2012 and continue through the 2014-15 fiscal year.
- Refocusing and Redesigning Programs and Services. Reduce funding for OASAS programs that fail to meet established performance indicators; reduce and restructure 41 existing gambling education, assessment and referral programs; delay the development of five gambling prevention programs and three Recovery Community Centers; and eliminate planned new funding for additional re-entry services. The 1.1 percent reduction to local payments implemented in 2010-11 is also continued.

Providing Services under Drug Law Reform. Continue the current year levels of funding for OASAS costs related to recent drug law reforms, including maintaining 250 residential beds added in 2010-11. As a result, services for this population will be supported within existing OASAS capacity by enhanced performance and the prioritization of services.

# **PROGRAM HIGHLIGHTS**

OASAS administers a comprehensive array of prevention, treatment, and recovery services for New Yorkers. This is accomplished through a highly qualified network of State, local government, voluntary agency, and school district providers with a paid and volunteer workforce of 35,000. In accordance with Federal and State statute, OASAS licenses and regulates program providers, ensures that fiscal resources are appropriately spent, and assists local programs in providing the highest quality services.

Approximately 260,000 individuals receive services annually in New York State's licensed chemical dependence treatment and problem gambling system, which is provided by approximately 1,100 community-based programs. About 107,000 individuals are enrolled in New York's chemical dependence treatment programs on any given day. OASAS also provides funding to approximately 300 prevention providers located in over 2,800 sites, combined with an additional 114 community coalitions across the State. They utilize evidence-based, outcome-oriented programs focusing on such risk factors as family conflict, permissive attitudes towards alcohol and substance abuse, and lack of commitment to school, which research shows are predictive of adolescent problem behaviors like alcohol and substance abuse, delinquency, teen pregnancy, school drop-out, and violence. While reducing these risk factors, prevention programs also focus on nurturing healthy beliefs and clear standards within community and family, since combining both activities is crucial to reducing the prevalence of problem behaviors like alcohol and substance abuse.
