OFFICE OF ALCOHOLISM AND SUBSTANCE ABUSE SERVICES

MISSION

The Office of Alcoholism and Substance Abuse Services (OASAS) is responsible for licensing and evaluating service providers, and for implementing and advocating policies and programs for the prevention, early intervention and treatment of alcoholism and substance abuse. In conjunction with local governments, providers and communities, the Office works to ensure that a full range of necessary and cost-effective prevention and treatment services is available statewide.

ORGANIZATION AND STAFFING

The Office of Alcoholism and Substance Abuse Services is headed by a Commissioner, responsible for the development and management of the State's policy on chemical dependence. The Office exercises these responsibilities directly as a provider of treatment services through a statewide system of 13 Addiction Treatment Centers (ATCs), through the regulation and oversight of chemical dependence prevention and treatment services, and as a conduit for Federal and State financial assistance. The Office also furthers State policy goals in areas that include criminal justice, health care and public assistance by coordinating chemical dependence resources and strategies in collaboration with other State agencies.

In 2005-06, OASAS will have a workforce of 956, of which nearly 60 percent provide an array of clinical treatment services through the ATCs.

FISCAL BACKGROUND AND BUDGET HIGHLIGHTS

The 2005-06 Executive Budget recommends \$524.5 million in State and other resources for OASAS to continue agency and community operations. This funding is supplemented by Federal and State resources budgeted in other State agencies, and by the contributions of local governments, voluntary agencies and other sources. Overall, the recommended budget is sufficient to ensure the full operation of the 13 State-operated ATCs, as well as the maintenance of health and safety standards in voluntary facilities.

The 2005-06 Executive Budget includes \$8.5 million in new funding to improve existing residential chemical dependence services. These funds will be used by OASAS to provide targeted funding enhancements for not-for-profit providers in an effort to improve the recruitment and retention of qualified direct care treatment staff, address demonstrated and significant increases in employee health insurance and general liability insurance costs, as well as maintain treatment opportunities for the working poor.

OASAS will continue to review and manage prevention services funding to ensure that actual program spending supports, to the maximum extent possible, the provision of evidence-based direct programming efforts and activities. Ongoing efforts in this area have identified an ability to reduce OASAS contract funding for school-based prevention services provided by the New York City Department of Education by \$3.1 million during 2005-06 without impacting the provision of evidence-based direct prevention services to children in the City's public schools.

Furthermore, OASAS will achieve administrative and other operational efficiencies by reducing funding to local chemical dependency prevention and treatment services providers whose performance is not meeting established standards, as determined through OASAS' annual performance measurement, review and evaluation processes. In addition, efficiencies will be achieved by reducing funding to those provider agencies that deliver less critical and less cost effective services, or whose agency administration and overhead costs are higher than system-wide and regional averages. Overall, these actions will generate \$4.5 million in State savings during 2005-06.

In addition, as part of the 2005-06 Budget Recommendations, OASAS will continue to:

- Implement the recently approved community-based detoxification and intensive case management initiatives, which will improve patient care and outcomes while reducing costs;
- Develop a new residential treatment model for adolescents;
- Further strengthen the State's Compulsive Gambling Education and Treatment Program with an additional \$1.0 million in funding;
- Maximize non-General Fund revenue sources to minimize State taxpayer support; and
- Apply structural and procedural changes to maximize the use of existing resources.

PROGRAM HIGHLIGHTS

Heading the largest chemical dependence service system in the nation, OASAS administers a comprehensive array of prevention and treatment services for New Yorkers. This is accomplished through a highly qualified network of State, local government and voluntary agencies and school districts. In accordance with Federal and State statute, OASAS licenses and regulates program providers, ensures that fiscal resources are appropriately spent, and assists local programs in providing the highest quality services.

Approximately 267,000 patients are served annually in New York State's licensed chemical dependence treatment and rehabilitation system, which consists of approximately 1,200 community-based agencies. OASAS also provides funding to approximately 300 prevention providers who utilize science-based, outcome-oriented programs focusing on such risk factors as family conflict, permissive attitudes towards alcohol and substance abuse, and lack of commitment to school, which research shows are predictive of adolescent problem behaviors like alcohol and substance abuse, delinquency, teen pregnancy, school drop-out and violence. While reducing these risk factors, prevention programs also focus on nurturing healthy beliefs and clear standards within community and family, since combining both activities is crucial to reducing the prevalence of problem behaviors like alcohol and substance abuse.
