

**Education Law §3614 School Funding Allocation Report
Part F - Narrative Description**

- 1. Describe the local methodology/approach used to allocate funds to each school in the district. If schools are allocated funds—either in part or in full—through a formula, outline the nature/mechanics of the formula and the elements impacting each school’s allocation.**

The funding of schools is based on need as presented by the school principal; then assessed by the Superintendent of Schools; then discussed with the Board of Education to determine each school’s funding. The items and variables discussed and considered include student enrollment, district and building goals, student opportunities and achievement. This discussion and consideration involves members of the school buildings, district level administrators and the board of education, with public presentations at board of education meetings.

- 2. If applicable, is there anything unique about certain schools which explain why per pupil spending at these locations may be significantly higher/lower than the district average?**

Non-applicable

- 3. If applicable, describe any items which the district feels are anomalous in nature and require additional description beyond the Excel entry.**

Non-applicable
