

**Education Law §3614 School Funding Allocation Report**  
**Part F - Narrative Description**

- 1. Describe the local methodology/approach used to allocate funds to each school in the district. If schools are allocated funds—either in part or in full—through a formula, outline the nature/mechanics of the formula and the elements impacting each school’s allocation.**

The staff salaries were allocated to the building where the employees work. Individual building allocations for materials, supplies, textbooks are based on BEDS enrollment and are distributed equitably during the budget process. Specific program costs were assigned to the building/student population that receives the service/material. For example, C-Tech students attend the program at the high school only and therefore these costs were assigned to the high school.

- 2. If applicable, is there anything unique about certain schools which explain why per pupil spending at these locations may be significantly higher/lower than the district average?**

Enter response here.

- 3. If applicable, describe any items which the district feels are anomalous in nature and require additional description beyond the Excel entry.**

Enter response here.
